DETAILED ACTION

1. This action is responsive to communication filed 6/22/10.

Response to Amendment

2. Examiner acknowledges amendment to have the program residing on computer readable medium. However, the claims still read on the signal. Also, the machine in the method was deleted. Thus, 101 rejections for in view of bilski have been added.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 17-31 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter based upon consideration of all of the relevant factors with respect to the claim as a whole, claim(s) 17 is held to claim an abstract idea, and is/are therefore rejected as ineligible subject matter under 35 U.S.C. 101. The rationale for this finding is explained below: There is insufficient recitation of a machine or transformation. The claim is mere statement of a general concept which includes mental activity. Dependent claims 18-31 when analyzed as a whole are held to be patent ineligible under 35 U.S.C. 101 because the additional recited limitation(s) fail(s) to establish that the claim(s) is/are not directed to an abstract idea, as detailed below: the additional limitation are no more than a field of use as the devices are intended use as they are in the preamble.

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The USPTO "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" (Official Gazette notice of 23 February 2010), can be read <http://www.uspto.gov/web/offices/com/sol/of/2010/week08/TOC.htm#ref20>

Claims 32 and 46 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 32 and 46 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter as follows. Claims 32 and 46 are drawn to functional descriptive material recorded on a computer readable medium. Normally, the claim would be statutory. However, through the guidelines of February 23, 2010 Official Gazette Notice,

The United States Patent and Trademark Office (USPTO) is obliged to give Claims their broadest reasonable interpretation consistent with the Specification during proceedings before the USPTO. See *In re Zletz*, 893 F.2d 319 (Fed. Cir. 1989) (during patent examination the pending claims must be interpreted as broadly as their terms reasonably allow). The broadest reasonable interpretation of a claim drawn to a computer readable medium (also called machine readable medium and other such variations) typically covers forms of non-transitory tangible media and transitory propagating signals per se in view of the ordinary and customary meaning of computer readable media, particularly when the specification is silent.

The specification is silent defining computer readable medium that stores the claimed computer program. The broadest reasonable interpretation of a claim drawn to

a computer readable medium typically covers forms of non-transitory tangible media particularly when the specification is silent, which is ***non-statutory*** subject matter.

“A transitory, propagating signal ... is not a “process, machine, manufacture, or composition of matter.” Those four categories define the explicit scope and reach of subject matter patentable under 35 U.S.C. § 101; thus, such a signal cannot be patentable subject matter.” (*In re Nuijten*, 84 USPQ2d 1495 (Fed. Cir. 2007)).

Because the full scope of the claim as properly read in light of the disclosure appears to encompass non-statutory subject matter the claim as a whole is non-statutory. The examiner suggests amending the claim to include a tangible computer readable storage media, while at the same time excluding the intangible transitory media such as signals, carrier waves, For example claims to include non-transitory tangible computer readable medium. Any amendment to the claim should be commensurate with its corresponding disclosure.

Allowable Subject Matter

5. Claims 1-16, 33-45 and 47-48 are allowed.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
